Kukkonia from Žitný ostrov (Rye Island)

Fertile soil and ideal conditions
for agriculture

REGIONAL BRAND Kukkonia was born out of love for Žitný ostrov (Rye Island). It stands firmly on fertile soil in the embrace of the Danube. It is founded on a successful agricultural tradition in the pulse of the present.

WIDE PORTFOLIO Kukkonia specialises in dairy products, meat products and fruit and vegetable products. Our mission is to bring a balanced product offering from the bounty of our land.

ACTIVE LIFE IN THE KUKKONIA REGION alongside food production, Kukkonia is also active in the areas of culture, ecology, sports and tourism.

Kukkonja Milk

KUKKONIA MILK - A proud brand of the Euromilk dairy

The dairy was founded in 1964 and since 2001 it has been called Euromilk.

From its founding and up to the present, it has stood on the long tradition of agricultural production in southern Slovakia – in the heart of Žitný ostrov (Rye Island). The production structure is closely specialised in long-life milk, cream, butter, curd cheese, sour milk products and pudding powders.

EUROMILK, a. s., guarantees the quality of products by using raw ingredients from Slovakia, qualified employees and the latest technologies. Aside from sales on the Slovak market, the company exports a significant volume of production to foreign markets and cooperates with multinational chains as well as independent customers. Given the distances, only 70 km from the capital Bratislava, 129 km from Budapest and 130 km from Vienna, the company has a convenient location for logistics. And it is this favourable strategic location, the extensive plains and the still living tradition of cattle breeding and milk production that directly predetermine it for successful development. The company has built reliable and long-term business relationships with milk suppliers, including its own farms, which are a guarantee of fair cooperation and the high quality of its own production.

OUR VALUES:

We make products based on proven processes and traditional recipes.

We use the latest world technology.

We guarantee high quality.

We operate on the basis of mutual trust and respect with partners.

A period of positive changes

For the future period, we defined 4 main pillars that reflect our belief in bringing quality products from proven regional sources with a respect for nature. We also adapted an ecological product design for this aim and prepared a nationwide campaign.

From Žitný ostrov (Rye Island)

Guarantee of the origin and high quality of products

Ecology

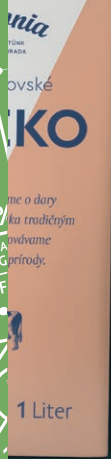

Green Kukkonio – An ecological approach: eliminating plastics, recycling, long-term sustainability

New design

Distinctive clean visibility – visually different – a boldly clean design

Slovakia-wide campaign

Special marketing support

Ecological

We are eliminating plastics and helping with recycling and long-term sustainability

We carefully selected the new packaging for our dairy products to satisfy our environmental requirements. We are very glad that we can deliver our traditional products to market in fully recyclable packages made without aluminium and only from natural resources and bioplastics.

You'll easily recognise our ecological packaging thanks to the green icon.

*The Kukkonía brand was born out of love of Žitný ostrov (Rye Island).
We take care of our land, because it takes care of us and blesses us
with its gifts.*

GREEN KUKKONIA

We bring projects that contribute to long-term sustainability. We plant trees, clean the banks of the Danube or make the transition to ecologically friendly packaging, such as the one you are holding in your hands. We recycle responsibly. Together we are taking care of the future for our children.

PACKAGING WITH AN EMPHASIS ON RENEWABLE RESOURCES

Cardboard without aluminium while preserving the same quality

82% wooden fibre obtained from responsibly managed forests

18% of plastics plant-based by weight

During the process of producing packaging plastics are used that were made on the basis of weighted balance, with which fossil-fuels sources were replaced by plant-based resources. This measure effectively contributes to improving the carbon footprint.

Special marketing support

We have special marketing programmes prepared for our customers and partners. We have a strong story built on the proven quality of our products that we want to share with people. We have prepared a media mix of the most effective online and offline communication channels.
